

TopoDroid sketch shift

Marco Corvi

marco.corvi@gmail.com

2017 - TopoDroid v. 3.4.3

Sketch shift

- moving the drawings with respect to the reference (midline, splays, stations)

When

- PocketTopo sketch import
 - may be not properly aligned
 - should not need rescaling
- Therion “sketch import”
 - usually not aligned (xtherion and TopoDroid have different reference frames)
 - may need rescaling

Howto

- 1) set the sketch window in “moving” mode
- 2) in the sketch references dialog check
“fixed ref.” box
- 3) drag the drawing with two fingers
- 4) touching the screen with a third finger you can
rescale the drawing
