2017 - TopoDroid v. 3.4.3

Sketch split

- cut or copy some drawings and create a new sketch
- only for plan or profile views
- the new sketch has the same zero-station
- the new sketch has empty profile or plan

Split howto

- menu “Rename/Delete”
- enter new sketch name
- “Split” button
- To copy check “Copy items” box

Sketch merge

- include the drawings of another sketch in the current sketch
- only for plan/extended-profile view
- include only plan or only profile drawings

Merge howto

- Add the reference of the outline of the other sketch:
 - in the reference dialog check “sketch outline”
 - select the other sketch
- merge the sketch displayed in outline
 - in the references dialog check again “sketch outline”
 - select “merge” button
